Online Ecommerce Web Application | (MERN Stack)

- Built a full-stack ecommerce platform with secure checkout, cart management, and product browsing.
- Implemented **role-based dashboards** for users and admins with secure authentication and authorization
- Developed and connected RESTful APIs for product management, cart operations, orders, payments, and user management.
- Integrated AI-powered features, including AI-generated passwords and automated product descriptions for admins.
- Added cart functionality with **quantity & size handling**, wishlist (favorites), order history, and real-time order status updates.
- Integrated COD and online payments with automated email notifications for orders and status updates.
- Built an admin panel to manage products, orders, delivery status, and view **exact delivery location with optimal delivery routes**.
- Used MongoDB to manage users, products, orders, and transactions, and deployed the application to production.
